PRODUCT CONCEPT

GP-Tech, the top of the AGV helmet line, was conceived, designed, and developed with the one precise objective of being the benchmark for helmets primarily destined to racing use. Made on the basis of the best of AGV racing experience, the GP-Tech combines safety, ventilation, and perfect comfort with an extremely innovative and aerodynamic design.

DESIGN

GP-Tech design is the most innovative in the market today, and its assertively modern lines clearly distinguish it from its competitors. Aesthetics is not merely an end in itself, however: the slender and streamlined chin guard, the lines at the sides, the top air vents and the back tail all make the helmet extremely aerodynamic, ensure excellent ventilation, and guarantee perfect safety performance in case of impact.

SHELL

The GP-Tech is available in 3 outer shell sizes with sizes that run from XXS to XXXL. The outer shell vaunts SSL layering made in Carbon, Kevlar and fibreglass in order to keep weight low while ensuring the maximum safety.

VENTILATION

The integrated IVS ventilation system consists of channels formed directly in the outer shell that ensure more efficacious airflow inside the shell and better aerodynamic performance. The front air vents and the chin guard vents permit constant flow of fresh air inside the helmet. The 5 rear extractors carry away all the moist warm air from inside the helmet through the channels in the EPS.

VISOR

The Race-X flat visor with its ample field of vision provided with anti-scratch and anti-fog treatment ensures 100% protection from UV radiation and is designed to be fitted with tear-offs.

INTERNAL PADDING

The internal padding is made in specific fabrics for different areas of the head. Coolmax fabric on the front, temples, and the nape promotes excellent perspiration absorption, the soft microfibre fabric on the cheek pads ensures the greatest comfort and freshness; the hyper-breathable microfibre fabric on the top of the head provides the best complement to the helmet's ventilation and promotes the flow of air to the wearer's head. The internal padding has also been provided with sanitizing treatment and are completely removable and washable.

The nose guard and the chin guard are removable and washable.

PRACTICALITY/SAFETY

The air vent on the chin guard has 3 positions:

- with the cursor in the center, the air vent is closed;
- with the cursor in low position, the air vent is open and ensures efficacious air flow inside the helmet;
- with the cursor in high position, the visor's micro-opening function that permits immediate and efficient visor defogging is used.

The visor mechanism with the XQRS system permits the quick substitution of the visor and has a safety system that keeps the visor from detaching in case of fall when used together with the Racing kit (composed of perforated visor and safety screws available as accessory). The fastening system vaunts DD closing with a double ring.

SIZES AVAILABLE AND CUSTOMIZED FIT

SIZES AVAILABLE/SIZE FIT								
OUTER SHELL	1				2		3	
EPS	1		2		3		4	
SIZE (CM)	XXS 51-52	XS 53-54	S 55-56	M 57-58	L 59-60	XL 61-62	XXL 63-64	XXXL 65-66
CHEEK PAD THICKNESS (MM)	30	25	30	25	25	20	25	20

CHEEK PAD OPTIONS								
SIZE	XXS	XS	S	M	L	XL	XXL	XXXL
ORIGINAL THICKNESS (MM)	30	25	30	25	25	20	25	20
INCREASED THICKNESS (MM)	-	30	-	30	-	25	-	25
REDUCED THICKNESS (MM)	25	-	25	-	20	-	20	-

Each crown pad is interchangeable inside each EPS. The cheek pads are interchangeable for the sizes in the same outer shell. Cheek pad customization possibilities are indicated in the chart.

TECHNICAL DATA SHEET

- Outer shell in 3 sizes with SSL layering (fibreglass, Kevlar, Carbon)
- IVS (Integrated Ventilation System) ventilation with numerous channels formed directly in the outer shell for more efficacious airflow inside the helmet and better aerodynamic performance
- 2 front air vents and 2 rear extractors
- Micro-opening system for the visor for effective defogging under even the most extreme conditions
- New visor mechanism with XQRS (X-tra Quick Release System) for visor removal and replacement without tools in just a few seconds. Safety system that prevents visor detachment in case of fall
- The Race-X flat visor with its ample field of vision provided with anti-scratch and anti-fog treatment ensures 100% protection from UV radiation and is designed to be fitted with tear-offs
- Removable nose guard
- Removable wind protector
- Completely removable and washable internal padding (including neck roll)
- Fabrics provided with sanitizing treatment with differentiated characteristics for greater comfort: high humidity absorption Cool Max at the front, temples, and nape; hyper-breathable fabric for efficient air circulation at the upper part of the head; soft micro-fibre fabric to ensure comfort and freshness on the cheek pads
- The fastening system vaunts a DD closing strap
- Sizes: XXS-XXXL
